Re Arch's 2/2/71,

What else do we know about what Mayhew has?

Is this Ruby's "diary" or is this the old papers found in the old building? I taped a phone interview with the reporter on that and while I do not recall the details, it is my impression these were too old for any probable significance, except for old connections, as with crooks.

Whether or not there was a Bowen-LHO link in NO, there was at least one LHO-Mexico link there. I doubt through FPCC, which it is past time for Arch to have realized didn't exist there. Tell him the alias on the printing order was "Osborne" and that LHO didn't get the job done or when completed.

I know nothing about the Mafia types, b t Rosselli has an interesting connection. When Mayheu sued Hughes, he had a handwriting expect. The one Lloyd Cobb, not Shaw's lawyers, got for Shaw-Appel
